📽️ Sunday Service Slides Editor · One-Page Guide

Edit each Sunday's worship content in the browser and build & download the whole-service PowerPoint (`.pptx`) in one click. No PowerPoint install, no local server.

🚀 Quick start (6 steps)

1. Open the app URL and enter the **password** to log in.
2. Pick the **service date** on the left; if the week is missing, use 「＋ 新增週次」 and enter `YYYY.MM.DD`.
3. On the 「✏️ 編輯內容」 (Edit content) tab, fill the sections with the **nine step buttons** at the top (**any order works**).
4. Click 「💾 **儲存目前內容**」 (Save current content) on the left.
5. Click 「📽️ **製成整場投影片（合併＋編譯）**」 (Generate full service).
6. Click 「⬇️ **下載 PPTX**」 (Download) to get `Sunday_Service_<date>.pptx`.

The nine sections: 1 Call to Worship · 2 Hymns · 3 Offering · 4 Scripture · 5 Sermon · 6 Response Hymn · 7 Communion · 8 Announcements · 9 Announcements MP4

🗂️ The two tabs

- ✏️ **編輯內容 (Edit content)**: a guided wizard, one section at a time; choose the service-wide font at the top.
- 📽️ **製作成投影片 (Build slides)**: check each section's source (upload / cloud / web content), then build and download the service — and use 「🔍 **檢查整場投影片**」 to verify the deck.

💾 Save reminder

- While you type, edits live in the browser session only — **save (💾 儲存目前內容) before switching dates or logging back in.**
- Week content lives in Google Sheets (falls back to a local file); fetching scripture from fhl.net auto-saves once.

⭐ Main features

- **Scripture fetch & auto-pagination**: pick a book from the dropdown and type a reference (e.g. 詩篇 `34:1-3`), then fetch from fhl.net in one click; multi-book, cross-chapter, 和合本 / 和修版 / 新譯本; auto-splits by font size and never breaks mid-punctuation.
- **Hymns & Response Hymn**: ① **search the lyric library** → ② **pick a song from the 「結果」 results** → ③ **click 「⬇️ 匯入整首詩歌」** (import the whole hymn) to fill in the full lyric and title card automatically. 4 built-in hymnals (教會聖詩 · 粵語其他詩歌 · 美樂頌 · 輔助本), plus background images, text shadow, lyric size 48–52pt.
- **Upload or fetch from OneDrive**: any section accepts a ready-made `.pptx` (the file wins), or fetch standard names from OneDrive (`psalm_` / `sermon_` / `announcements_`…).
- **Communion / Apostles' Creed**: tick to include; auto-ticked on the **first Sunday** of the month.
- **Announcements MP4**: upload a video or build one in the app; it can be merged as page 1 of the service to loop until clicked.
- 🔍 **檢查整場投影片 (Check full-service deck)**: verifies the scripture ↔ sermon reference, hymn page counts (≥ 4 pages each), lyric/typo comparison against the hymn library, and the first-Sunday communion template.
- **Scripture-only flow**: builds just `scripture_<date>.pptx`; not part of the full service and not saved to Sheets.

🎬 Watch the demos (highly recommended)

Sections that have a demo show a 「🎬 **看操作示範**」 (Watch demo) button next to the title; clicking it **loops** that section's real workflow in a pop-up (~3 s per frame). Watch first, then follow along — the fastest way to learn.

Demos available: 1 Call to Worship · 2 Hymns · 4 Scripture · 5 Sermon (OneDrive pick) · 6 Response Hymn · 8 Announcements
